The foregoing report is respectfully submitted by

C. C. GREENWOOD,
GEO. R. DANIELL, } *Auditors.*
JOHN M. HARRIS,

NEEDHAM, January 31, 1874.

SELECTMEN'S REPORT.

Your Selectmen, believing a report should be made, and, in the absence of by-laws, follow what they consider to be their duty, and respectfully submit the following.

ALMSHOUSE.

In the selection of a Warden, the Board was fortunate in securing the service of Mr. Ezekiel Peabody, who is well-known to our citizens as a capable and efficient manager. His services were engaged to April first, instead of March first, as has usually been the custom; believing that the Overseers of the Poor should have at least one month in which to find a suitable person for the place.

POOR.

The number of persons fully supported by the town during the year, both in and out of the Almshouse, is nine. The whole number, including the above, but excluding vagrants or travellers, aided by temporary relief, or partial support, is fifty-seven. The number supported in the Almshouse at present is three. The expenditure for the support of Poor out of Almshouse this year has been considerably in excess of any year since 1869; Ephraim Loker and Dennis Kelly having been sent to the Insane Asylum at Taunton, Mary McLaughlin to the Workhouse at Bridgewater, and an unusual number of persons rendered needy by the heads of families being thrown out of employment.

SMALL-POX.

A claim has been made against the State for money paid out in the Small-Pox cases, and a large portion of it has been allowed, as has also some on account of the State poor which will be paid back to the town, and materially reduce these items.

LOCK-UP.

This has been built at the Almshouse, in pursuance of a vote of the town. The cost was $650, being $350 less than the appropriation. In connection with the institution, it is likely to prove a valuable acquisition, it being found convenient as well as necessary in many cases to commit "tramps" to the cells.

HIGHWAYS.

As year after year our roads have been improved until they have compared favorably with those of other towns, so this year, under the liberal appropriation made by the town, we may claim still further improvements; one more, which will add largely to the safety and beauty of our driveways, can be made by our citizens without cost, by using some less conspicuous and more suitable place to put old rubbish and heaps of stones than by the side of the road. Of the $3,200 which was voted to be expended under the direction of the Selectmen, $667 have been expended for railings in North District. This expenditure was necessary for the safety of travel, and, though previously needed, had been neglected for want of a sufficient appropriation.

CENTRAL STREET.

Nearly $3,000 of the appropriation of $3,500 for this street has been expended. The remaining part will be sufficient to complete the work.

FOREST AVENUE.

For this road $1,000 was appropriated, $950 of which have been expended. The work has been done where in the judgment of the Selectmen it was considered to be for the best interest of the town. A further sum is needed, and $1,000 will be asked for at the March meeting.

GREAT PLAIN AVENUE.

$1,200 was voted for work on this Avenue. The extension having been completed, a further appropriation will be necessary to complete the widening as ordered by the County Commissioners.

WOODLAWN AVENUE, FORMERLY GROVE STREET, GRANTVILLE.

The appropriation of $300 for this street was sufficient for its limits, but the widening since renders a further sum necessary.

DEDHAM AVENUE (NEW DEDHAM ROAD).

This road having been completed, and about $250 of the appropriation unexpended, your Selectmen would recommend that the balance be transferred to the treasury.

MARK TREE ROAD.

This road, like the tree from which it was named, having been for generations known to but few only from hearsay, under the appropriation of $500, together with the $259.35 that remained unexpended of a former appropriation, has again been opened to public travel.

MAPLE STREET.

The appropriation of $300 for this street proved more than sufficient, $250 only having been expended.

PETITIONS.

Numerous petitions have been received and acted upon in the following order for widening old, and laying out new roads: —

1. A private way in Grantville between land of C. R. Miles and land of Noah Perrin. Laid out, and accepted at Town meeting in August.

2. Woodlawn Avenue (formerly Grove street), in Grantville, widened; $200 awarded for land taken. Accepted at Town meeting in August. An appropriation of $300 will be needed on this street.

3. Garden Street, at the Plain. Located and widened; $50 awarded for land damage. Accepted at Town meeting in August. An appropriation of $300 will be necessary for this street. On a petition for re-location of this street, the request was not granted.

4. Street from Hatch's factory to Webster street near house of J. Scotten, referred to next Board.

5. Pickering street, at the Plain, laid out, and if accepted an appropriation of $300 will be needed.

6. May street, petition not granted.

7. Oak street, laid out to Railroad; $200 needed for grading.

8. Reservoir street, from Worcester street across the Reservoir, to intercept the road leading from the county road at Upper Falls, near house of Callahan Corkery.

9. Also street from county road at house of Callahan Corkery to house of Bartholomew Daly.

These two roads require special notice. The road from the house of Callahan Corkery to the house of Bartholomew Daly is a private way. On this private way, and in its immediate vicinity, with no other outlet, are not less than twenty houses. The petitioners justly claim that this should be a public street. In connection with this, they wish a street from Worcester street across the reservoir, to inter-

cept this private way. The cost of building the first-mentioned street will be about $1,000, and the one across the Reservoir, if with a stone arch, $3,700, if with a wooden bridge, $2,200.

Your Selectmen have laid out both of these streets, and would recommend the town to accept the first, and give the second due consideration; the item of expense alone standing in the way of the petitioners' needs. Land and water damages for both streets $350.

10. Webster street, from Dedham avenue to W. A. Kingsbury's corner, so called, widened, awards made for land damage amounting to $250. No appropriation needed this year.

11. Laurel avenue, Grantville, laid out. No land damage. No appropriation required.

12. Chestnut street, — the order having been received from the County Commissioners for widening this street from the Stedman place to Day's bridge, $500 will be needed to do the work.

BRIDGES.

The wooden bridge at Lower Falls has been rebuilt, during the year, according to a vote of the town, and under the appropriation of $3,000.

The bridge at Ellis' Mill, at Upper Falls, has also been rebuilt, at a cost of $400. There having been no special appropriation for this bridge, the money was supplied from the $3,200 set apart for the highways, to be expended under the direction of the Selectmen.

FIRES.

The question of furnishing means for protection in case of fire is attracting considerable attention in some of our villages. Your Selectmen would recommend that a Fire Commission be appointed at the March meeting to examine and

inquire as to the best and most feasible plan to be made use of in any of our villages where protection is needed, and report at an adjourned meeting.

CEMETERY.

We would call the attention of our citizens to an article, which will be found in the warrant for the March meeting, asking the town to purchase land for a cemetery, both in the East and in the West Parish. This is a matter of the utmost importance as to the interests of the town, and consequently should not be acted upon hastily. The true interest of the whole people should be considered. That a cemetery should not be in the midst of a village, most will admit. In the selection of a spot to be ever after held sacred, much care and forethought should be exercised.

In a town growing as rapidly as ours, something beyond the present emergency should be sought for.

It is becoming a custom in our large towns to select burial-places outside of the thickly settled districts. Can anything better be done for our interest, or so much tend to unite our sympathies as to have but one cemetery, and that as near the centre of the town as possible, taking into consideration access and adaptation of soil?

In the early history of our town it seemed proper that a cemetery should be near the church in each parish; but these having become nearly or quite filled, other ground is needed. We therefore venture to suggest that the town appropriate the piece of land south-east of the Town House, now belonging to the Town, and make provision for such additions as may be required, and can reasonably be obtained.

By taking this action we shall have a spot removed from the noise and bustle of trade, outside our villages, as health demands, accessible from every direction by good roads, and away from the lines of railroad.

TOWN HALL.

The necessity of a more commodious room for holding our town meetings is plain to all.

Your Selectmen would recommend that a French roof be put upon the present building, with an entrance by a stairway built on the outside, thus giving a hall double the area of the present one.

SALARY OF TOWN OFFICERS.

It is desirous that the Town should establish by vote the salary to be paid by its officers. The present system, if not incorrect, is certainly unpleasant, and with the Selectmen and Treasurer the pay received is inadequate to the labor performed.

MUNSON BOND.

The town having expressed a desire at its last annual meeting in March, that the Munson bond should be looked after, your Board complied, and, having consulted experienced counsel, find it is good for twenty years. Mr. Munson stands ready to carry out his contract at any time the town shall demand, but prefers not to at present.

ESTIMATES FOR THE CURRENT YEAR.

In presenting a list of items for which appropriations are asked, we have placed against each the amount we consider necessary, being guided by our experience during the past year, and the best information we could obtain as to the requirements for the ensuing year.

Schools and incidentals	$15,000 00
Poor	3,000 00
Repairs of highways	7,000 00
Collection, discount and abatement of taxes .	4,200 00
Miscellaneous and necessary charges . . .	1,200 00
Fire, heretofore included in miscellaneous . .	500 00

Town debt, or Newton Road, if needed	$10,000 00
Salary of town officers	3,200 00
Decoration Day	200 00
Forest avenue	1,000 00
Removing obstruction from streets	1,000 00
Interest	4,200 00
Printing	550 00
Removing snow	1,200 00
Great Plain avenue	1,000 00
Garden street (including land damage)	350 00
Woodlawn avenue (formerly Grove street, Grantville, including land damage)	500 00
Pickering street	300 00
Oak street	200 00
New road at Upper Falls	1,000 00
Chestnut street	500 00
	$56,100 00

REPORT

OF THE

SCHOOL COMMITTEE

OF THE

TOWN OF NEEDHAM,

FOR THE

YEAR 1873–74.

REPORT.

The events of a single year in our schools hardly furnish matter for an extended report. The young faces grow older, the little forms become more mature, death comes occasionally to make a gap even in these young ranks; but the story of each year is about the same. The obstacles to progress give more room for comment than the progress itself. The wider the range of age in scholars at one school, the more difficult it is to furnish the best educational facilities. Thus, if a neighborhood furnishes but fifty scholars ranging from five to fifteen years, there can be only one teacher, while there must yet be at least four classes; and the time and attention given to each must be very limited. If, on the other hand, the same neighborhood furnishes two hundred pupils, each of the four classes will become a separate school, with a teacher wholly devoted to each. The same cause affects also the character of the studies. To hear four classes daily in reading and spelling, geography and arithmetic, with attention at the same time to the discipline of the school, is quite as much as can be expected of one teacher, and the committee have, therefore, found it impossible to find much time for music and drawing and other similar branches, notwithstanding the general demand for them; time, that is, on the part of the teacher, as the overwork hardly extends to the scholars. If we had scholars enough to give three or four schools where we now have two, it is easy to see how much more effectual as well as comprehensive work might be done.

These remarks apply more especially to the High Schools. In the West High School, which has more especially come under the writer's observation, there have been forty scholars, the largest number which has ever been on the record, though it is to be hoped the supplies from the lower schools will increase in future. The master of this school has to hear from twelve to sixteen recitations in each day of five hours, — a state of things which is absolutely incompatible with thoroughness of instruction, no matter what the qualities of the teacher may be. The committee have hesitated, in view of the limited number of scholars, to incur the expense of an assistant, but if the school is to maintain any high degree of efficiency it is indispensable that this should be done; and there is the greater stimulus in the increasing disposition of the inhabitants to send their children to this school instead of out of town.

The same cause, the limited number of scholars, has operated against the earnest efforts of the teacher, aided by the committee, to keep up the standard of a High School. The lower schools are so full, that relief is almost a necessity by promoting scholars who are hardly competent to pursue the higher branches. With all these drawbacks, however, it is believed that the High School affords as good opportunities for scholars who wish to study as the average of its class. For those who require forcing, not always a minority, reforms in the directions above alluded to are of great importance.

The question of compensation for teachers has repeatedly presented itself. Our Primary School teachers have received ten and the Grammar School teachers twelve dollars per week. With board at five dollars per week, and other necessary expenses, the inducement to ladies of competent education and governing power is not very great; and it should be borne in mind that our teachers deserve more

rather than less pay than those in larger places, because it is much more laborious and unsatisfactory to have the whole charge of four classes, as above described, than to be able to devote one's self entirely to a single class. It is, no doubt, possible to get good teachers on our present terms, because there is always a pressure from the interior towards the city, and skill in selection is all that is required; but to retain them for any length of time is another matter. Four of our teachers have thus been taken away in little more than a year, leaving us the moderate satisfaction of making our schools a training-ground for the supply of more attractive positions. The committee have not attempted to bind their teachers by long engagements, because they reserve the right to dismiss any teacher on short notice, and they have felt that simple justice would allow the same privilege to teachers in bettering themselves.

One other point has forced itself upon the attention of the committee, — the want of more efficient central administration on the part of the State. The Board of Education, in their thirty-sixth annual report, say, "Being invested by the statutes with limited powers, their responsibility is correspondingly restricted. They have no specific powers to undertake measures for the improvement of the Public Schools, or to prescribe any regulations respecting their management or instruction."

It results from this, that while our cities and towns are incurring heavy expenses in the matter of school buildings and the material appliances of education, there is reason to fear that Massachusetts is not maintaining her high place as regards the system of education. In fact, there can hardly be said to be any general system at all. While large towns support expensive methods of superintendence, having, however, no reference to each other, in smaller places the whole organization depends upon a committee, practically unpaid,

and for the most part fully engaged in other business. Abstracts of school reports are published in a large volume, but there is no authority entrusted with embodying the results in definite legislation and in forcing it upon the attention of the General Court. Our school statutes are therefore confined to a few generalities, and a certain amount of detail in matters of discipline. Like many other branches of administration the condition of education points to the necessity of the presence in the Legislature of a State official having the power of guidance in legislation and responsibility for its results.

It remains to speak of the accommodations for schools. It will be remembered that at the last March meeting, beside the appropriation of $11,000 for school purposes, $3,000 for incidentals were also granted. It will not be invidious to remark that nearly the whole of this has been spent on the east side of the town. It is to be hoped that the Greendale school-house will before long cease to be an item of expense in construction account. The three new school-houses at the Plain, at Highlandville and at the Upper Falls, have called for a good deal of work in the way of grading and fencing, so that the "Incidentals" of the last year should in fact be mainly regarded as an additional appropriation for those buildings. On the west side little has been done in the last year, less because there was no need of it, than because it seems desirable that whatever is done should be upon some well-digested and comprehensive plan. In the Primary and Grammar Schools at Wellesley there have been on the register from 120 to 130 names in the last year. In the Primary School, with about 80 scholars, the committee have been obliged to employ an assistant. For the reasons above stated, it would increase the efficiency of the whole and the educational advantages if there were three separate schools Primary, Intermediate and Grammar, occupying the three

rooms of that building. This would require other arrangements for the High School, which for other reasons would be but just. Before the building at Wellesley was constructed, the High School alternated every year between Wellesley and Grantville. Since that time the scholars from Grantville and the Lower Falls, constituting quite half of the attendance, have been obliged to go by the cars. The committee have not been justified by the statute in paying these car-fares without a special appropriation for that purpose by the town.

In Grantville there is an excellent Primary School, under the charge of Miss Phillips, which meets with general acceptance by the inhabitants of that section. But the more advanced scholars have to attend either at the Lower Falls or at Wellesley.

Meantime the attendance at the North School has reached the full capacity of that building, the registers showing from 110 to 120 names in the last year. It would seem desirable, therefore, to erect a new building midway between the Lower Falls and Wellesley to give accommodation to a Primary and Grammar School, with a temporary roof, which might hereafter allow the addition of another story for a High School, whenever Wellesley shall require, as it must before long, all three of the existing rooms for the lower schools.

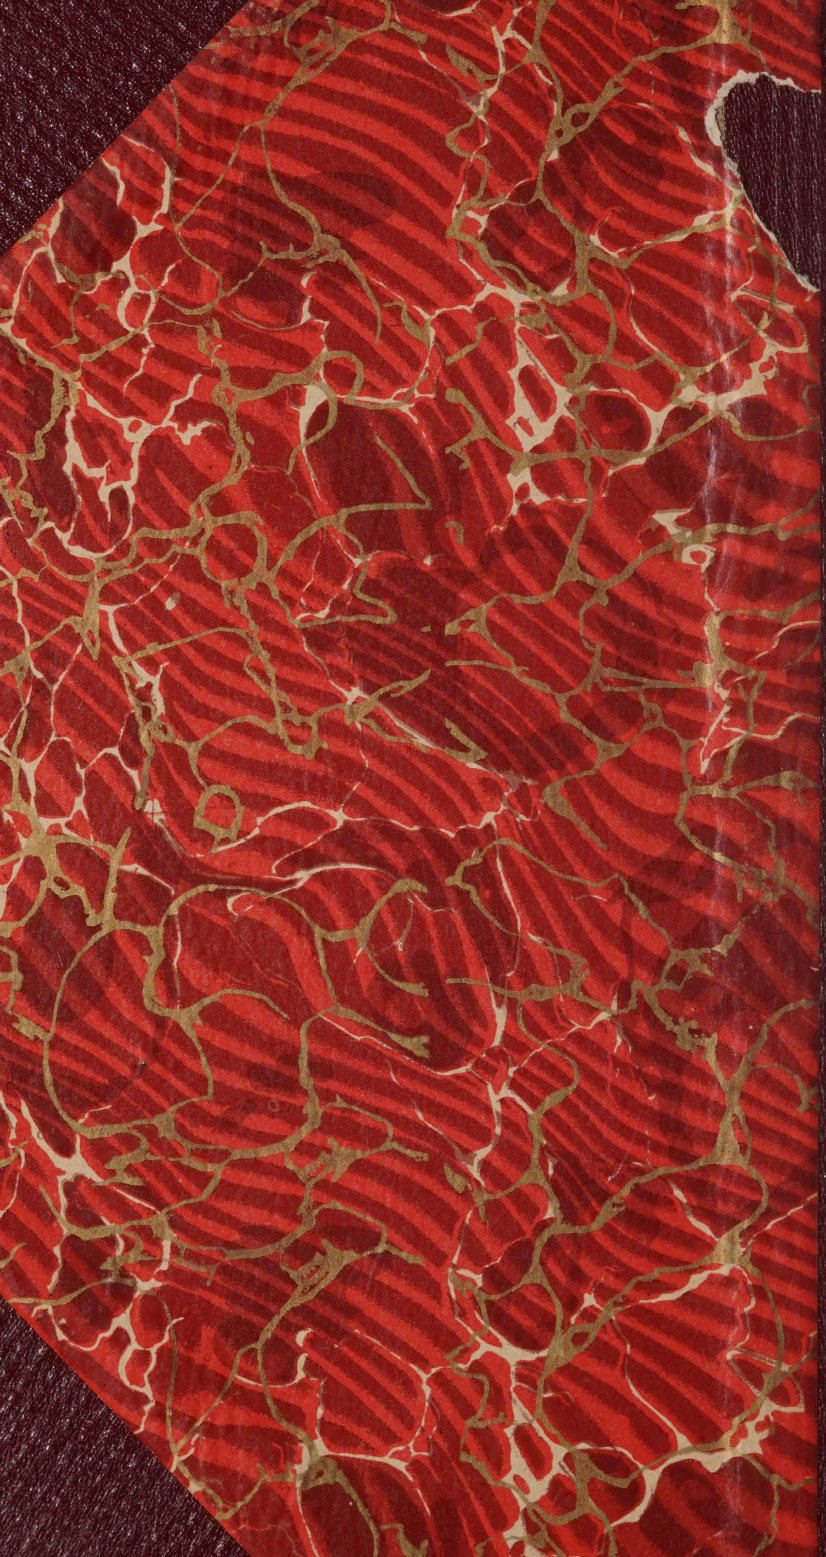
There has been much demand at the Lower Falls for better accommodation of Primary scholars in the vicinity of the Aqueduct bridge. This might be met, if the above plan were adopted, by removing the present North School, or, what would perhaps be better economy, the sale of that building and lot for a dwelling-house, and the erection of a new building.

If any of these things are done, however, it is manifestly desirable that they should not be left to the school committee, but entrusted to a separate building committee. The quali-

ties needed for the superintendence of schools are entirely distinct from those which are requisite for the proper construction of buildings, and both functions are not to be expected from the same parties.

For the Committee,

GAMALIEL BRADFORD.

Chairman.


NEEDHAM, Jan. 1, 1874.
